Education

University College London *Sep 2025 – Jun 2028*
BSc Computer Science - First Class Honours *London, UK*
- Awarded full-tuition £130,500 Global Undergraduate Scholarship (2% acceptance rate)
- Teaching Assistant for Object-Oriented Programming
- Modules: Object-Oriented Programming, Algorithms, Security, Discrete Mathematics

Cedar College *Aug 2023 – Jun 2025*
*A-Levels - 4A*s* *Karachi, Pakistan*
- Valedictorian with 2nd Highest A-Level marks out of 100k students regionally

Experience

Research Assistant *Sep 2026 – Present*
UCL *London, UK*
- Independent second reviewer, screening and extracting data from studies on safe, trustworthy, scalable AI-based extraction of numerical data from biomedical text.
- Paper being prepared for submission to Journal of Biomedical Informatics, under the supervision of Miss Lara Carter PhD Candidate at UK Research Institute.

IT Specialist *Aug 2026 – Present*
UCL *London, UK*
- Provide first-line technical support to 65,000+ university staff, students & alumni.
- Troubleshoot issues with Multi-Factor Authentication (MFA), Single Sign On (SSO), network connectivity & hardware.

AI/ML Workshop Leader *Oct 2025 – Present*
UCL Schools Engagement *London, UK*
- Designed and delivered workshops for school students on Python, swarm intelligence, and robotics.
- Grew the Robotics club into the top 3 most popular clubs in the school.

Open-Source Contributor *Apr 2021 – Jun 2021*
Fedora Linux *Remote*
- Contributed to Fedora Linux, used by 1+ million people worldwide
- Designed badges, logic models and banners in line with existing brand identity to revamp the Fedora Forums, following UX guidelines & ensuring community satisfaction

Projects

LLM Security Research *Nov 2025*
LangChain, LangSmith, Python, Hugging Face
- Investigated 0-day vulnerabilities in agentic AI systems under multilingual jailbreaking prompts
- Observed a 0.43 mean risk score & presented research to senior engineers at NVIDIA, AWS & Valyu

Oberon - Agentic AI Visualizer *Nov 2025*
React, Node.js, TypeScript, LangChain
- Built a tool to visualize multi-agent workflows as an interactive graph, allowing prompt refinement in real-time
- Cut down AI usage costs by 5.4x by optimizing per-agent token consumption and implementing real-time error detection

Tetris Autoplayer Bot *Sep 2025*
Python, OOP, PyGame, Heuristic Algorithms, Git
- Implemented a Tetris-playing AI in Python that optimizes for 4-line clears using a multi-feature weighted heuristic (hole count, stack height, bumpiness, line clears)
- Ranked in the top 10% of a 200-student cohort on a live leaderboard

Skills

Programming Languages: Python, C, Java, TypeScript, JavaScript, SQL, Haskell

Frameworks & Tools: React.js, Next.js, Vercel, pygame, Node.js, LangChain, LangSmith, REST APIs, Git
